

Morpho - Bug #3978

when adding people from another dataset, check to see that ids are unique

Description			
a user used the feature to add a creator from a person in another dataset, The incoming responsibleParty had an ID attached. The user did this twice using the first person as the template for the second (since the address was the same). So now, both creators have the same ID in the EML. Morpho should check these IDs.

Finally fixed this, though it was motivated not by reading the bug report, but by Jim's work with the jellyfish group!
