Bugzilla-Id:	3989		

Description

for the questions 31, 32, 33, 34, 35 from Exam 3 fall 2005, parser does not recognize the paragraph correctly. it does scan the questions but the text itself messed up. for example, if the original question is " which of answer is about the process of metabolism? then parser recognize like "process of meta which of answer is bolisim about the. " and parser have a trouble to scane choice E. it does not scan entire sentence. it just scan partial part of sentence.

History

A few related errors while parsing Fall05-Exam3.pdf:

- Q25-Q27 choice E is pruned! Q25 has an image associated with it.
 - Q28 all choices pruned!
 - Garbled text and image misassociation with Q29

#3 - 05/18/2009 12:17 PM - Sandeep Namilikonda

The garbled text output seems to be a result of a faulty input file and not due to any faulty code. Here are the reasons why I think thats true:

- Fall05-Exam3.pdf was created by merging two different documents (part1 and part2) using a (non-standard) PDF converter.
- Fall05-Exam3-part1.pdf and Fall05-Exam3-part2.pdf created by Adobe professional v8.0 from the ".rtf" files of the corresponding original documents did not generate those errors.
