

Kepler - Bug #3994

Report Designer - use "workflow outline" rather than Items of Interest

04/20/2009 01:49 PM - ben leinfelder

Status:	Resolved	Start date:	04/20/2009
Priority:	Normal	Due date:	
Assignee:	debi staggs	% Done:	0%
Category:	reporting	Estimated time:	0.00 hour
Target version:	2.0.0-alpha1	Spent time:	0.00 hour
Bugzilla-Id:	3994		
Description Instead of requiring that users manually add ports and parameters to the list of "Items of Interest" - we could use a filtered outline of all the namedObjs in the model that would likely be be "reportable". Would want to omit the cruft and only include "leaves" in cases where there are nested entities. The objects with leading underscores would be gone, and there are likely other objects we could safely assume would never be reported on from the model. Note: I'm not seeing the "tree view" of the model as an option in the View menu anymore, but that would be a starting point for the outline view.

History

#1 - 06/15/2009 01:56 PM - ben leinfelder

i'm going to push that this be the approach we take for the 2a1 release.

#2 - 06/19/2009 08:17 PM - ben leinfelder

I've modified the designer panel to allow it to accept dragged objects (NamedObjs) from the outline view.
This is a major win!

getting there....

#3 - 06/19/2009 09:39 PM - ben leinfelder

This is now a viable source for ports AND parameters.
I'd like to use it as the sole source for Dynamic Report Items.

#4 - 06/22/2009 03:58 PM - ben leinfelder

now the top portion of the ItemsOfInterestPanel [re]uses the workflow outline view of the workflow contents. you can drag from there onto the report.
