Kepler - Bug #3996

Report Model - [de]serialize Items of Interest

04/20/2009 01:58 PM - ben leinfelder

Status:	Resolved		**Start date:**	04/20/2009
Priority:	Normal		**Due date:**

Bugzilla-Id:	3996			

Description

After selecting items of interest from a workflow model, you will loose those selections if you close Kepler. We need to persist those selections when we save the Report Layout (ROML). We'd also need to load them back when we open a ROML. That is unless we abandon the whole Items of Interest approach in favor of a filtered model outline (see bug #3994)

still advocating for shifting our efforts toward an Outline-view-based approach to items of interest.
Leaving this out of the 2a1 target right now.

#2 - 06/22/2009 04:21 PM - ben leinfelder

closing this - not needed since we are using the Outline viewer as a source for items of interest
