<b>Target version:</b>	2.0.0	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	4006		
<b>Description</b>			
We want better facilitate modularization (and allow different release schedules for this very important actor). I'll take the RExpression and RExpression2 actor (and related classes and libs) from the "util" module and make an "r" module

History

#1 - 04/21/2009 02:48 PM - ben leinfelder

- moved code and demos and dlls and jars to the "r" module
- added "r" module to "kepler-trunk" modules.txt (might need to do a change-to to get it again)
- removed R from "util" (classes and jars), "common" (demos and libs) modules
