

Morpho - Bug #402

can't update data files in current Morpho UI

01/23/2002 08:50 AM - Matt Jones

Description Joel Gramling reports: Additionally, I haven't figured out if you can add more data to a table once you have already established the descriptions or if you have to reload updated datasets as new ones. This is indeed a problem. Right now you can add a new data table (with metadata), and you can associate a data table with an existing set of metadata, but there is no way to change an existing table. Need to be able to change the data file associated with the data set (which creates a new revision, but doesn't delete the old!). Sometimes this will require a change in the metadata as well (ie, to update coverage info), while other times no change in metadata will be needed other than to associate the new entity & file.			

History

#1 - 03/05/2002 03:56 PM - Dan Higgins

In attempting to update data files, it was discovered that Metacat apparently does not allow a simple version increment to occur.

One work-around is to create a new ID everytime a data file is changed, but that results in a loss of information about previous versions. Thus the question "When is a data doc new and when is it a revision?"

#2 - 03/12/2002 11:35 AM - Dan Higgins

Ability to edit data while displayed in a table and then then submit those changes is now enabled.
