Kepler - Bug #4051

R - include R distribution in separate module

Description

Instead of including the R dist in the core Kepler module, we want to have it in a separate module so that upgrades to R can occur with upgrades to the RExpression ("r" module) and vice-versa.
We'll want the installer/build system to support packing up distributions from modules/suites and this will provide a good test bed for doing just that.

History

#1 - 05/18/2009 11:07 AM - Chad Berkley

R is now in it's own module and the installer can install it separately.
