Bugzilla-Id:	4101		
Description Currently there is a small list of static report items that we are using in the reporting module, so these items are added directly to the GUI in the ItemsOfInterest class. I think it would be better and would support future development if we created a 'static report item manager' class that provides the ItemsOfInterest with a list (or map, etc) of the static items that are available.			

History

#1 - 06/15/2009 11:21 AM - debi staggs

The manager class has been added, though it is likely to need to need additional enhancements. The SWING components for the static items are no longer being added directly to the GUI, and this class is now responsible for instantiating the StaticReportItems instead.
