i believe this was identified as a high priority for 2a1 . we can retarget if i was mistaken

#2 - 06/15/2009 03:15 PM - debi staggs

Yes, you are correct, it was identified as a high priority for the first release. In addition, this bug is being worked on and is around 80% completed on the report designer side of the app. i.e. the interface is done, and the sections just need to be added to the report model, which I am currently working on.

#3 - 06/26/2009 12:17 PM - debi staggs

We can add sections to the report, and the text is larger and bold for the section headers.

#4 - 06/29/2009 08:52 AM - ben leinfelder

now rendering this in the report instance

#5 - 06/30/2009 11:18 AM - ben leinfelder

we have "section" headers now
