

EML - Bug #4115

emlparser and metacat-emlparser do not return same results

05/28/2009 10:12 AM - Margaret O'Brien

Status:	New	Start date:	05/28/2009

Bugzilla-Id:	4115		

Description

The parser at <http://knb.ecoinformatics.org/emlparser/parse> is not reporting the same results as the parser when a document is inserted at <http://metacat.lternet.edu/knb/style/skins/dev/loadxml.jsp>

The emlparser reported that a document passed the references check. The document was rejected by LTER's metacat because the content of one of the <references> contained a tag, and so did not exactly match the id.

I did not try inserting the document at the knb metacat, but presumably, knb and lter are using the same code.

History

#1 - 05/28/2009 04:44 PM - Margaret O'Brien

Correction:

The document was rejected by LTER's metacat because the content of one of the <references> contained a SPACE, and so did not exactly match the id.
