Bugzilla-Id:	4119		
Description			
Now that he have a Kar Entry Handler for ROML, we need to use the cache+lsid for storing and retrieving that layout for any given workflow. I'm halfway there - there is a reportlayout cache object, it just needs to get wired up on both ends of the open/save KAR.			

History

#1 - 06/01/2009 10:51 AM - ben leinfelder

making progress using ObjectManager to keep track of workflows and layouts. still using Workflow and WorkflowManager (in the reporting module) for some glue, but those are now performing look ups using LSIDs rather than the "workflow name"

#2 - 06/09/2009 11:59 AM - ben leinfelder

will continue to use the WorkflowManager (for sanparks).
Using LSID for the linkage - that's a win!
