

Kepler - Bug #4142

EML 2 Dataset caches restricted datasets, allows access across sessions

06/09/2009 12:05 PM - Oliver Soong

| Target version: | Unspecified | Spent time: | 0.00 hour |
| Bugzilla-Id: | 4142 | | |
| Description | | | |
| I authenticated to search and add an EML 2 Dataset actor for a restricted data table. If I save the workflow, close Kepler, and re-open, I can run the workflow and access the data without authenticating. This seems slightly unsafe, although it may be intended. | | | |

this is known behavior. as you say there is a certain "oh, really?" factor to it. I've marked to revisit at a "LATER" date.
