Description

In MultipleChoiceResponseItem.generateXML, there is a possibility of allowing multiple responses. However, the code below doesn't make a lot of sense:

if(multipleResponses){
xml.append("<response_lid ident = \"Q"+id+"\" rcardinality = \"Multiple\" rtiming = \"No\">\n");
xml.append("<render_choice shuffle = \"Yes\" minnumber = \"1\" maxnumber = \"4\">\n");
}

In particular, the maxnumber attribute is just an arbitrary number, and so there needs to be a way for the user to specify this.
