

Kepler - Bug #4162

using the alt key makes menus appear in strange places on OSX

06/15/2009 03:53 PM - Chad Berkley

Bugzilla-Id:	4162		
<b>Description</b> if you do alt-F or alt-E on the mac, the menu shows up on the application window instead of coming down from the menu bar. Not sure if these alt key combos are even supposed to work on the mac. Might just disable it.
