Bugzilla-Id:	4165		
Description			
Create TPC search and browse skins in the sanparks skin.			

History

#1 - 06/16/2009 07:51 AM - Michael Daigle

Created common skins using css. Styles the search/browse in the sanparks skin.

More tuning will need to be done once the kepler workflow archiving functionality is complete.

Also, the squery functionality should be improved to allow for grouping criteria for the same node.

#2 - 11/18/2009 12:22 PM - Michael Daigle

Tested successfully with kepler archiving.
