

Metacat - Bug #4166

Create archive extraction functionality

06/16/2009 07:54 AM - Michael Daigle

Status:	Resolved	Start date:	06/16/2009
Priority:	Normal	Due date:	
Assignee:	Michael Daigle	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.9.2	Spent time:	0.00 hour
Bugzilla-Id:	4166		
Description			
Create the ability for metacat to read data from an archive. This will extract the archive and get the desired file.			

History

#1 - 06/16/2009 07:57 AM - Michael Daigle

Added a parameter to the read http api called archiveEntryName. If this is set, metacat will extract the archive referenced by docid (if not already extracted) and read the entry specified by archive name.

Currently, jar type archives are supported (jar, war, kar).
