

Kepler - Bug #4168

User documentation creates bloat in workflows

06/18/2009 09:49 AM - Chad Berkley

<b>Status:</b>	New	<b>Start date:</b>	06/18/2009
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>	2.X.Y	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	4168		
<b>Description</b> Currently, the user documentation is copied into every actor instance as the actor is drug to the canvas. The problem that this is addressing is that people need to be able to customize the documentation for actors that they have customized on the canvas. The problem with this approach is that it creates unnecessary duplicate documentation in every actor instance. One solution would be to diff the documentation against the original and just store what is different in the actor instance.
