#### Description

If I run with the following modules.txt:

```
wrp
workflow-run-manager
*reporting
```

I get the following error if I exit Kepler with the command+Q keyboard shortcut:

```
"Could not create tab pane.: ptolemy.actor.gui.Configuration"
```

I do not get this error if I close the last window of Kepler or if I use Kepler->Exit, and it shuts down cleanly in those cases.

#### History

##### #1 - 08/06/2009 08:31 AM - ben leinfelder

i remember chad fixing this a while back. verified that i get no error on os x
