

Kepler - Bug #4201

Cannot set column widths on the Workflow Report Tab

06/29/2009 04:37 PM - Chad Berkley

Description			
I'm trying to set the widths on the columns for the workflow report pane. The columns refuse to change their widths. Have tried using <code>setPreferredWidth()</code> (the recommended way) and <code>setWidth()</code> , both to no avail. Code is in <code>WorkflowRunManagerPanel.java</code> line 269. Any ideas?

You can get the WRM column widths to take effect if you first
`wrmjTable.setAutoResizeMode(JTable.AUTO_RESIZE_OFF);`

However then when you resize your kepler window the columns don't auto-resize, which is really ugly imo. Hopefully there's a way to leave `auto_resize` on and set default preferred widths...

#2 - 06/29/2009 05:54 PM - Derik Barseghian

fixed in r19633.

Feel free to tweak the widths.

I had problems when trying to leave auto resize on and set all `setPreferredWidths`, but when just setting a few, it seems to work fine.
