Kepler - Bug #4212

Report Designer - Clicking the delete button removes unselected items

06/30/2009 02:59 PM - Chad Berkley

Bugzilla-Id:	4212		

Description

If nothing is selected on the canvas and I click the delete button, it seems to remove a randomly chosen component. If nothing is selected, nothing should be removed. Also, items that are selected need to have a larger selection border. It's hard to see that the skinny border is blue.

History

#1 - 06/30/2009 04:44 PM - ben leinfelder

If nothing is selected, don't delete anything.

#2 - 07/01/2009 10:34 AM - Chad Berkley

fixed. if nothing is selected, nothing will be deleted.

#3 - 07/01/2009 11:02 AM - Chad Berkley

forgot to click the fixed button

#4 - 07/01/2009 05:26 PM - debi staggs

Fixed all remaining issues with this bug.
