

Kepler - Bug #4249

create 64 bit installers

07/15/2009 12:45 PM - Chad Berkley

Status:	Resolved	Start date:	07/15/2009
Priority:	Immediate	Due date:

Category:	build system	Estimated time:	0.00 hour
Target version:	2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4249		
Description			
We can now create 64 bit installers for kepler, so I need to add a build target to do that and remove the disclaimers on the installer and the web site that say we don't support 64 bit arch.			

History

#1 - 07/16/2009 11:40 AM - Chad Berkley

Added functionality to the build system to build the 64 bit installer. Changed the disclaimer on the web site and in the readme.
