Category:	build system	**Estimated time:**	0.00 hour
Target version:	2.0.0	**Spent time:**	0.00 hour
Bugzilla-Id:	4257		

Description

Problems are caused when the build-area is not updated with 'ant update' We should at least have a switch to force this if not do it by default.

History

#1 - 07/22/2009 02:18 PM - Chad Berkley

added the ability of the UpdateModules task to update the build-area. It can be turned off by setting updateBuildArea=false. The revision can also be set independently of the rest of the module revisions by setting buildAreaRev=XXX.
