

Kepler - Bug #4299

Kepler needs to be evaluated to determine when native (AWT) widgets would be preferable to Swing widgets.

08/07/2009 03:26 PM - David Welker

Description			
After Java 1.6 update 12, it is acceptable to mix Swing and AWT. In many cases, AWT is superior, because it makes use of operating system specific widgets, which cause less cognitive dissonance in users. We should require users to upgrade their copy of Java to at least Java 1.6 update 12 and evaluate all of the situations in which it would be advantageous to use AWT widgets instead of Swing.

Need to wait for OSX to support this version of java before we can require it.

#2 - 08/27/2009 02:57 PM - Daniel Crawl

major gui changes postponed to after 2.0.
