

EML - Bug #43

ResourceVariation type not needed

07/26/2000 08:26 PM - Matt Jones

Status:	Resolved	Start date:	07/26/2000

Description

In the resource.xsd XML Schema document, the ResourceVariation type is not needed. Instead, it would be better to just have a set of top-level elements defined (like dataset and literature) that can be used as the docroot for particular resource documents. This would eliminate the need for the whole file "resourceExample.xsd".

History

#1 - 08/09/2000 02:23 PM - Chad Berkley

resourceVariation was removed.

#2 - 03/27/2013 02:13 PM - Redmine Admin

Original Bugzilla ID was 43
