Kepler - Bug #4313

Workflow Run Manager - duplicate rows shown for same execution

08/13/2009 01:21 PM - Derik Barseghian

Description

Sometimes more than one row shows up in the Workflow Run Manager for the same execution. I saw this happen for the first time today, when running the attached workflow (error.xml). I've run this workflow in the past without seeing this. It doesn't happen every time. The hsql database seems fine, it only has one execution for the run.

History

#2 - 08/13/2009 02:03 PM - Derik Barseghian

fixed in r20272. The problem was with the query statement for getting runs, which was returning multiple rows per execution when an execution had multiple errors. I'm temporarily no longer querying for errors. Addressing error(s) will fall under bug #4231.
