

Kepler - Bug #4322

Attempting to save changes to a workflow saved in a KAR file fails

08/18/2009 11:32 AM - Sean Riddle

Status:	Resolved	Start date:	08/18/2009
Priority:	Immediate	Due date:	
Assignee:	Aaron Aaron	% Done:	0%
Category:	installer	Estimated time:	0.00 hour
Target version:	2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4322		
Description			
The following fails:			
1) Create new workflow			
2) Instantiate a Constant actor			
3) Right click on canvas and Save Archive			
4) Create new canvas and close existing workflow			
5) Open the workflow from the library pane by Right-clicking on Workflows->WorkflowName and select "Open Archive (KAR)"			
6) Change the value of the Constant actor			
7) Close canvas. Kepler will inform you it wants to save change to file [path to Kepler directory]. Of course saying 'yes' won't work.			
Possible solutions: Either save things back correctly to the KAR file, or if this is not the desired behavior, disable the save functionality (and the save reminder, of course).

It should prompt you to resave it in the KAR from which it originally came. If you don't want to overwrite that existing KAR, then that should be an option too.

#2 - 01/13/2010 03:30 PM - Chad Berkley

Fix this after 4515 is done.

#3 - 01/28/2010 12:45 PM - Aaron Aaron

Yeah, this still needs to get done. Will make sure to get it into the RC1 release.

#4 - 02/02/2010 04:42 PM - Aaron Aaron

User is now queried to save a KAR file instead of xml file.
