Bugzilla-Id:	4330		

Description

common/resources/configurations/config.xml gets modified at some point in the build or run.

module directories are considered read-only and no modification of or creation of files is allowed in a module. If needed, files can be written, modified and deleted in the "configuration" directory.

History

#1 - 08/26/2009 04:06 PM - Chad Berkley

This should get fixed when the configuration system gets reworked.

#2 - 09/18/2009 03:37 PM - Aaron Aaron

Looks like this was fixed by bug 4370 The EcoGridServicesController trying to write persistent data back to the config.xml file was what was happening.
