

Kepler - Bug #4334

Rename actor from canvas

08/26/2009 11:34 AM - Aaron Aaron

Status:	Resolved	Start date:	08/26/2009
Priority:	Normal	Due date:	
Assignee:	Aaron Aaron	% Done:	0%
Category:	core	Estimated time:	0.00 hour
Target version:	2.X.Y	Spent time:	0.00 hour
Bugzilla-Id:	4334		
Description			
Add "Configure Name" right-click functionality to canvas. This allows a user to change the default name of a workflow (Untitled1) to a new name before saving the workflow (which pops up an annoying rename dialog if the name is still Untitled1).

History

#1 - 08/26/2009 01:49 PM - Christopher Brooks

This is an enhancement, though I understand that some might see the extra dialog box that is popped up as a bug.

#2 - 08/26/2009 03:03 PM - Derik Barseghian

Isn't popping up a Save As dialog when a file has never been saved and still has a default name normal and expected? This is what most programs do, e.g. textedit ms office, etc. What's the benefit here?

#3 - 08/26/2009 03:42 PM - Matt Jones

I agree with Derik that we need to normalize this user experience so that saving uses the familiar paradigm. Having to open a separate 'Rename' dialog before saving the KAR is not typical and will be annoying. Somehow need 'Save as..' to generate the name if it isn't already present.

#4 - 08/26/2009 03:58 PM - Aaron Aaron

Opening the 'Rename' dialog before saving the KAR is not mandatory.

#5 - 01/19/2010 02:10 PM - Aaron Aaron

I have added "Rename" menu item to the canvas context menu. This allows the user to rename a workflow without having to go through the save process. Closing this bug.

#6 - 01/19/2010 03:02 PM - Oliver Soong

Does this also fix 4631 (which might have been a dup)?

#7 - 01/19/2010 03:05 PM - Aaron Aaron

Quite possibly, can you check?
