Bugzilla-Id:	4345		

Description

need to document exactly what a module is and what a KAR is and how they relate
-- can a KAR go in a module, or vice versa?
-- what format should a run archive take?
-- what can/should go in each type of file?
-- what are scenarios of use (e.g., publication-ready archive)
-- how should projects that use Kepler make use of KARs and modules?
