

Kepler - Bug #4351

ant netbans fails due to missing file

08/29/2009 02:31 AM - Michal Owsiak

Status:	Resolved	Start date:	08/29/2009
Priority:	Normal	Due date:	
Assignee:	Chad Berkley	% Done:	0%
Category:	build system	Estimated time:	0.00 hour
Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4351		

Description

During ant netbeans, exveption is thrown:

```
[netbeans] java.io.FileNotFoundException: /home/michalo/kepler/build-area/resources/netbeans/ProjectXmlMiddle (No such file or directory)
```

```
[netbeans] at java.io.FileInputStream.open(Native Method)
[netbeans] at java.io.FileInputStream.<init>(FileInputStream.java:106)
[netbeans] at java.io.FileReader.<init>(FileReader.java:55)
[netbeans] at org.kepler.build.ide.FileMerger.merge(FileMerger.java:51)
[netbeans] at org.kepler.build.ide.FileMerger.merge(FileMerger.java:85)
[netbeans] at org.kepler.build.ide.Netbeans.merge(Netbeans.java:61)
```

NOTE! file ProjectXmlMiddle is missing. There is, however, another file:

```
michalo@rhodiola:~/kepler/build-area$ find . -name "ProjectX*"
./resources/netbeans/ProjectXMLMiddle
```

To solve the issue:

```
shell> ~/kepler/build-area/resources/netbeans$ ln -s ProjectXMLMiddle ProjectXmlMiddle
```

Suggestion:

either ProjectXMLMiddle should be replaced with ProjectXmlMiddle within repository
or ProjectXmlMiddle references within build system should be replaced with ProjectXMLMiddle
