Kepler - Bug #4354

Enable the build system to work on multiple SCM systems.

08/31/2009 11:46 AM - David Welker

Status:	New		**Start date:**	08/31/2009

Category:	build system		**Estimated time:**	0.00 hour
Target version:	2.X.Y		**Spent time:**	0.00 hour
Bugzilla-Id:	4354			

Description

The build system currently does many tasks using SVN. However, it is possible that in the future we may want to support multiple repositories, and those repositories might utilize different protocols. It would be useful to make the build more generic and allow the repository type to be specified as a parameter (where it defaults to SVN or another preferred SCM).
