

## Kepler - Bug #4363

### wrm does not properly handle ModelReference actor

09/03/2009 02:12 PM - Daniel Crawl

<b>Status:</b>	New	<b>Start date:</b>	09/03/2009
<b>Priority:</b>	Normal	<b>Due date:</b>

<b>Target version:</b>	3.X.Y	<b>Spent time:</b>	0.00 hour
<b>Bugzilla-Id:</b>	4363		

#### Description

The ModelReference actor runs externally defined workflows. This currently breaks some functionality in the wrm:

- opening a workflow from previous runs does not work since the external workflows are not stored in provenance.
- if there's an error in the external workflow, the execution row is not highlighted red in the current window.
- sometimes a new, separate row appears referring to the external workflow. (this might not be a bug, depending on your point of view).
