<b>Bugzilla-Id:</b>	4374		
<b>Description</b>			
When downloading assessment data with the "transpose" option selected, the dataset is incomplete.			

#### History

##### #1 - 09/10/2009 10:19 AM - ben leinfelder

testing on fred reveals that this does work as expected - not sure what the difference is between fred and EGR server.  
Note: there is still the "?column?" for foil E column header

##### #2 - 09/10/2009 10:51 AM - ben leinfelder

i'm skeptical that the latest war file on the EGR server does not actually contain all the latest files. I notice that the metadata fields about each assessment are being returned in *opposite* order. This is not the case on fred.  
I'm afraid i'll have to have arthur redeploy another war. d'oh!

##### #3 - 09/10/2009 11:22 AM - ben leinfelder

asked for a redeploy - hopefully it was just an error with an outdated war file that i provided.  
will test on EGR server when that is reinstalled

##### #4 - 09/10/2009 11:53 AM - ben leinfelder

after the updated war was installed on the EGR server, this feature worked. (phew!)
