Description

When a report item is deleted the properties window should be cleared.

History

#1 - 10/19/2009 12:21 PM - debi staggs

What currently happens here, is that when a selected report item is deleted, then that panel disappears, and the selection changes to the last report item in the report. I think that this behavior might be o.k., but maybe we should delete the item and then deselect all the remaining report item panels ?

#2 - 12/07/2009 10:30 AM - debi staggs

This has been fixed.
