

Kepler - Bug #4408

Kar upload to repository tries to insert twice

09/24/2009 10:03 AM - Michael Daigle

Status:	Resolved	Start date:	09/24/2009
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%

Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4408		
Description			
When choosing to save a KAR from the workflow canvas and then save to the repository, kepler sends an update request followed by an insert request for the same docid. This results in an "accession number already in use" error from Metacat.

Hmm, sounds like this might be an ecogrid - Metacat issue. I'll look into it.

#2 - 09/24/2009 01:39 PM - Michael Daigle

Soooo, metacat is doing an upload and then trying to do an insert of the same id. It looks like kepler is uploading data with an id and then uploading the metadata with the same id.

#3 - 09/24/2009 03:41 PM - ben leinfelder

the uploader was using the karlsid (again) for the metadata.
fixed
