

FIRST - Bug #4414

Only 1 item-level metadata tag is downloaded with data file

09/24/2009 01:01 PM - ben leinfelder

Status:	Resolved	Start date:	09/24/2009
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%
Category:	dataserver	Estimated time:	0.00 hour
Target version:	server-prototype	Spent time:	0.00 hour
Bugzilla-Id:	4414		
Description			
first values seems to be repeated and others are ignored. Same is true for transpose version of data download			

History

Mostly fixexd:

I have the first 2 metadata fields being returned. I can expand this (as a configurable option) to include more, but that is less than ideal.

I'd like to dynamically figure out the maximum number of metadata fields included in the questions being downloaded...not exactly sure how to go about implementing this. More ajax calls/queries behind the scenes?

#2 - 09/28/2009 11:58 AM - ben leinfelder

you can now specify how many metadata fields to include in the download
