

Metacat - Bug #4420

Enforce permissions for tpc workflow viewing and scheduling

09/28/2009 09:20 AM - Michael Daigle

Status:	Resolved	Start date:	09/28/2009
Priority:	Normal	Due date:	
Assignee:	Michael Daigle	% Done:	0%
Category:	metacat	Estimated time:	0.00 hour
Target version:	1.9.2	Spent time:	0.00 hour
Bugzilla-Id:	4420		
Description			
The existing squery functionality handles the visibility of workflows for the appropriate users.			
The schedule link for each workflow should be active only for users that have read permissions on the associated kar file.			

History

#1 - 11/18/2009 12:32 PM - Michael Daigle

Implemented the isValid service on the metacat authentication service, and added the authority service. The workflow scheduler verifies that the user session is valid (logged in) and that the user has the authority to write a workflow before allowing them to schedule a job.
