| Target version: | ecogrid-1.1.0 | Spent time: | 0.00 hour |
| Bugzilla-Id: | 4432 | | |
| Description | | | |
| It appears that all files are being treated as text when downloaded through the <code>AuthenticatedQueryService.get()</code> method. We need to handle binary data, of course. | | | |

History

Turns out this is a MetacatClient bug at it's core. MC was returning a Reader for all read() calls. But this uses characters and is not appropriate for binary data (ie a Zip file). Changing the method to return an InputStream - then we can handle both text and binary

#2 - 10/01/2009 03:24 PM - ben leinfelder

this just needs to be deployed (to dev.nceas.ucsb.edu first).
