Target version:	Unspecified	Spent time:	0.00 hour
Bugzilla-Id:	4437		

Description

This EML201 doc: knb-lter-sbc.3.7 contains 4 datatables. It has a dataset level access tree which includes an allow-public-read statement. Each data table also has additionalMetadata tree referencing it, also with allow-public-read statements. But one of the tables returns this message:

User public does not have permission to read the document with the docid sbclter.728.1

When you look at the doc, be sure to include the revision number. the most recent revision will have all those additionalMetadata trees removed.

History

#1 - 03/27/2013 02:26 PM - Redmine Admin

Original Bugzilla ID was 4437

#2 - 04/08/2013 02:01 PM - ben leinfelder

- Assignee changed from Michael Daigle to ben leinfelder

Is this a random instance, or an example of a prevalent problem with EML 2.0.1 packages that you have added?
