Description

I get the following exception when trying to drag a workflow to the canvas from the workflows folder after saving a kar.

```
com.microstar.xml.XmlException: Cannot create entity without a class name. in [external stream] at line 2 and column 31

I am unable to reproduce this. Can you give more detail on how to reproduce this? What actors you're using, what OS, what suite/modules, what java version, etc...? Thanks

#2 - 12/02/2009 01:03 PM - Aaron Aaron

I'm not seeing this... closing for now
