Description

V8 of the provenance schema must provide for tag storage and search. We will need to search for runs and workflows that have been tagged with the WRM tags search cell.

I've recently changed the tags table to have columns: id, type, searchstring, urn, and lsid, but this table may change.

History

#1 - 11/24/2009 04:19 PM - Derik Barseghian

Tag table is sufficient for this release, we decided to just do simple keyword searching in the WRM.
