Kepler - Bug #4456

Workflow Run Manager in Report Viewer

10/14/2009 05:06 PM - Derik Barseghian

Status:	Resolved		**Start date:**	10/14/2009
Priority:	Normal		**Due date:**

Category:	workflow run manager		**Estimated time:**	0.00 hour
Target version:	2.X.Y		**Spent time:**	0.00 hour
Bugzilla-Id:	4456			

Description

If in WRP you change to the Report Viewer and unhide the bottom panel where the Workflow Run Manager normally is, it's not there. Maybe it should be here, and behave differently than the normal "canvas wrm", instead automatically showing the report for any row you have selected (so that it's easy to quickly look through many reports). The context menu could still have the usual options. I'm filing this for 2.X.Y, for wrp-modules-1.0.0 I think we could get away with just not showing the panel area at all. Let me know your thoughts...

History

This was fixed - the WRM is in the Report Designer view now and reports show when you click on run rows.
If you just launch the WRM suite WRM is in the regular Workflow Editor view.
