Bugzilla-Id:	4459		
Description Currently morpho will use allowFirst as default access order. And it still respects the access order (denyFirst or allowFirst) from eml itself. However, it doesn't display the order in Access page. So sometime it is confusing to interpret the rules without displaying the access order. We need a minimum display of access order in Access page.

i've got the order showing/editing now. I'd like the controls to be disabled when you see the Data access that inherits from the metadata...but that's not yet working...

#2 - 11/30/2009 10:45 PM - ben leinfelder

Okay - got the enable/disable booleans working correctly now!
