<b>Bugzilla-Id:</b>	4466		
<b>Description</b>			
<p>If I save a workflow+report layout as a KAR and then attempt to reopen the KAR after restarting Kepler, the report layout does not show up.</p> <p>I've tracked this down to the fact that the workflow is "opened" before the report layout and the tab panes initialize at this point (before the report layout is "opened") so we end up with a default blank report layout.</p> <p>I believe we just need to swap out the default blank report layout when we get around to "opening" the report layout that is in the KAR file we just opened.</p>			

History

#1 - 10/20/2009 03:33 PM - ben leinfelder

using the event-state module to broadcast to the report layout UI that the report layout model has changed and that it should redraw itself
