Bugzilla-Id:	4467			

Description

Chad reported this during devLunch:
error restarting/opening Kepler:
"ERROR (org.kepler.reporting.rio.fop.ReportParser:parse:97) could not find workflow for LSID:"
I could not replicate it, but it deserves noting.

History

#1 - 11/10/2009 03:36 PM - Oliver Soong

I'm seeing this. The console indicates:

ERROR (org.kepler.reporting.rio.fop.ReportParser:parse:97) could not find workflow for LSID: urn:lsid:gamma.msi.ucsb.edu/OpenAuth/:964:30:97
at org.kepler.objectmanager.ObjectManager.getHighestObjectRevision(ObjectManager.java:241)
at org.kepler.reporting.rio.fop.ReportParser.parse(ReportParser.java:95)
at org.kepler.reporting.rio.fop.ReportRenderer.convertXML2Report(ReportRenderer.java:229)
at org.kepler.reporting.rio.fop.ReportRenderer.convertXML2Report(ReportRenderer.java:192)
at org.kepler.kar.handlers.ReportLayoutKAREntryHandler.cache(ReportLayoutKAREntryHandler.java:131)

I'm at r21428 following a clean-all, and I had just added the Kruger workflows folder as a local repository.

#2 - 11/10/2009 03:37 PM - Sean Riddle

I also can get this reliably.

#3 - 12/24/2009 01:27 PM - ben leinfelder

I'm closing this since I can't ever get it to happen for me and there's been so much change since it was entered that I bet it probably went away indirectly.
Please reopen if you are still seeing this bug.
