

Kepler - Bug #4468

Report Viewer - message to run workflow first

10/16/2009 11:57 AM - ben leinfelder

Status:	Resolved	Start date:	10/16/2009
Priority:	Normal	Due date:	
Assignee:	ben leinfelder	% Done:	0%
Category:	reporting	Estimated time:	0.00 hour
Target version:	wrp-modules-2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4468		
Description			
If switched to the report viewer before running a workflow, there should be a message indicating that you must run the workflow before viewing the report rendering			

History

#1 - 10/20/2009 05:08 PM - ben leinfelder

added MessageHandler.message() if no previous executions were found. i believe that's less intrusive than rearranging the contents of the tab pane depending on the available executions.

#2 - 12/14/2009 01:24 PM - Oliver Soong

I think this got killed with some recent commit. I'm at r22183.

#3 - 12/15/2009 08:47 AM - ben leinfelder

Since we're not refreshing the viewer when you switch views (now a tab) the only time it comes up is when you use the "refresh from latest" button. Other render operations are triggered by: a) report execution finishing and b) selecting a row in the WRM - both of those implicitly require execution history.
I've added the message for the refresh button...but there will be only a blank page and no warning until you do press it.
