Target version:	UnMilestoned	Spent time:	0.00 hour
Bugzilla-Id:	447		

Description

right now when the user uploads files to the server and requests that they be inserted there is no receipt showing the results of the database insertion process. This function is critical b/c there is no application validation layer and the user does not really know if the plot(s) has successfully be inserted to the database

History

#1 - 08/28/2002 08:16 PM - John Harris

Now after submitting plots(s) to the database the user receives a receipt. There are two options for receipts: a minimal receipt (about four lines describing the success of the loading process) and an extensive receipt which is currently an xml document that more extensively describes the data which were loaded to the database.

#2 - 08/29/2002 11:38 AM - John Harris

opening b/c the resolved setting is wrong

#3 - 08/29/2002 11:40 AM - John Harris

This is fixed

#4 - 01/31/2005 02:53 PM - Michael Lee

changed from components that are to be deleted to "misc" so that bugs don't get deleted with component. Sorry for all the email.
