<b>Description</b>			
There are some problems with Tagging /WRM interaction. We can add/refine this list as we go.			
1) Displaying the tags associated with a particular run in the tagging UI when that run is selected -- they often disappear when you select something else (as they should) but then don't reappear when the row is reselected.			
2) >1 rows may be selected, but if you tag at this point, only one row gets the tag. Likewise I imagine there's work to be done for showing all tags for all selected rows, and the logic for getting the right target when doing a remove.			
3) Workflow tags aren't showing up in WRM. I'm working on this one.

#1 - 10/30/2009 04:14 PM - Derik Barseghian

Looks like Sean has fixed [#1](#).  
I've fixed [#3](#).

[#2](#) still a problem.

#2 - 10/30/2009 04:17 PM - Sean Riddle

An easy solution for now would be to disable tagging (probably changing the displayed tagging context to something like "range selected" or something) when multiple rows are selected. The other solution that jumps out at me would be to tag all the rows; this sounds more desirable. What do people think?

#3 - 10/30/2009 04:49 PM - Matt Jones

Tagging all selected rows sounds more desirable to me. It would be common for someone to run a model a bunch of times and then want to tag a whole set, so multiple selection would be a natural thing to try in the UI.

Number 2 should also work now.
