

Kepler - Bug #4479

Error messages are not imported during run import

10/16/2009 04:11 PM - Derik Barseghian

Status:	Resolved	Start date:	10/16/2009
Priority:	Normal	Due date:

Target version:	wrp-modules-2.0.0	Spent time:	0.00 hour
Bugzilla-Id:	4479		
Description			
<p>When importing a WorkflowRun that contains error messages into provenance (creating a 'husk run'), the error messages are lost. I forgot to inject these.</p> <p>A related problem is that I'm not parsing the error messages from the serialized string form of a Map into a real Map (which I'll need to use). Though it's probably better to find a better way to serialize this map; the string form of the map is hard to parse since error messages can contain "=" and ",".</p>
