<b>Bugzilla-Id:</b>	4499		

#### Description

We will need to have VegBank query the NVCRS to get a list of updates. We need to define the scope of what's getting updated. Presumably, this means new community types, as well as their status, old types and new statuses, correlations of communities, and plot annotations to communities. Should not include plot data.

Source is section 2.3.5 number 21 of requirements document, page 48
